About Me

I am a curious and motivated Computer Engineering student currently in my fourth year at Marinduque State University. I am passionate about understanding how technology works and using it to create innovative and meaningful solutions that address real-world challenges. Whether I'm writing code, assembling electronic components, or working on team-based projects, I consistently strive to deliver high-quality work and enjoy every step of the learning and building process.

Academically, I embrace both hands-on activities and conventional learning methods, which I believe makes my approach to problem-solving unique. I enjoy mental challenges, particularly those that involve critical thinking and logic. My hobbies—including solving puzzles, playing strategic board games like chess, and brainstorming creative ideas—sharpen my focus, memory, and problem-solving skills. These personal interests not only fuel my passion for technology but also enhance my ability to adapt and innovate in the ever-evolving field of engineering.
